Business Audit

Thank you for requesting a Carbon Offset Business Audit. This audit will present a full understanding of your business's greenhouse gas emissions. The results can help ensure that your business truly is a CarbonNeutral™ Business and highlight areas where behavioral change may reduce emissions naturally.

Carbon credits certify the removal of carbon dioxide from the air. Each carbon credit is associated with the removal of a single ton of carbon dioxide from the Earth's atmosphere. Businesses produce approximately 60% of the carbon emissions from the production of good and services your customers purchase.

You can help reduce your businesses carbon footprint through energy conservation. Energy efficient equipment and recycling can help immediately. The use of Global Carbon Trax carbon offsetting will allow your business to become even more environmentally friendly. Global Carbon Trax carbon offsets are used for real carbon offsetting by producing energy using wind generation. We also use reforestation, grassland restoration and preservation of lands threatened by development to offset the carbon because they are the natural greenhouse gas scrubbers.

Our audits are written in compliance with The GHG Protocol Corporate Accounting and Reporting Standards.

Please complete all of the information requested. If you have any questions, please contact us at 612.216.4387 or by e-mail at corporateinfo@globalcarbontrax.com

Please fax completed form to Global Carbon Trax at 320.251.0727.
